

XXIII Biannual Symposium on Measuring Techniques in Turbomachinery

Stuttgart, 1-2 September 2016

Thursday 1 September 2016

08:00 – 08:50 Registration

08:50 – 09:00 Welcome to XIII SMTT

Session A1 Measurement of turbomachinery flows

09:00 *Measurement of unsteady aerodynamic data in turbomachinery periodic flows*

J. Lepičovský and D. Šimurda

Institute of Thermomechanics AS CR, Prague Czech Republic

09:25 *Measurement of thermal wakes in compressor secondary air systems using low frequency thermocouple data*

M. Puttock and M. Rose

Thermo-Fluid Mechanics Research Center, University of Sussex, United Kingdom

09:50 *Advances in heat transfer and unsteady flow measurements in a smooth stator rotor cavity with purge flow, with variable axial gap*

H. Koivisto and M. Rose

Thermo-Fluid Mechanics Research Center, University of Sussex, United Kingdom

10:15 *Experimental investigation of the effects of different installment positions of airfoil-probes on the flow field of a compressor cascade*

H. Ma and C. Jin

School of Energy and Power Engineering, Beihang University, China

10:40-11:00 Coffee break

Session A2 Temperature/entropy probes

- 11:00** *A new fast-response entropy and yaw probe*
M. Adams, M. Collins, K. Chana and T. Povey
Osney Thermofluids Laboratory, Oxford University, United Kingdom
- 11:25** *A fast response total temperature probe for turbomachinery*
M. Arenz, S. Staudacher, B. Lüttig, W. Berns and M. Rose
Institute of Aircraft Propulsion Systems (ILA), University of Stuttgart, Germany
- 11:50** *Unsteady temperature measurements through digital compensation of dual wire thermocouples*
J. Braun and G. Paniagua
School of Mechanical Engineering, Purdue University, Indiana, United States
- 12:15** *Highly reliable aerodynamic calibration for ground and flight testing total temperature probes*
F. Fontaneto and A. Lahalle
von Karman Institute for Fluid Dynamics, Rhode-St-Genèse, Belgium

12:40-14:00 Lunch at IBZ

Session A3 Novel instrumentation and hot-wire anemometry

- 14:00** *Wireless RF telemetry for rotating frame data acquisition and control*
J. Farman
Whittle laboratory, Cambridge University, United Kingdom
- 14:25** *Measurement of tip clearances using capacitive proximity sensors in turbine rotor stator cavities*
D. Payne and V. Kanjirakkad
Thermo-Fluid Mechanics Research Center, University of Sussex, United Kingdom
- 14:50** *Multi-hotwire probe sensitivity optimization in constant temperature anemometry (CTA) for transonic flows*
E. Yablochkin and B. Cukurel
Technion-Israel Institute of Technology, Haifa, Israel
- 15:15** *Towards a more reliable application of hot-wire anemometry in complex compressible flows*
E. Boufidi and F. Fontaneto
von Karman Institute for Fluid Dynamics, Rhode-St-Genèse, Belgium

15:40-16:00 Coffee break

Session A4 Test facilities

- 16:00** *Building a low speed research compressor at Seoul National University*
J. Lee, L. Lee and S. Song
Seoul National University, Seoul, South Korea
- 16:25** *A hands-on student lab for the relation between unsteady aerodynamics and structural dynamics*
J. Dahlqvist and J. Fridh
KTH Royal Institute of Technology, Stockholm, Sweden
- 16:50** *Development of a transonic linear compressor cascade test facility*
J. Rhee, J. Kim, J. Im and S. Song
Seoul National University, Seoul, South Korea
- 17:15** **Laboratory Tours**
- 19:30** **Departure for Dinner**

Friday 2 September 2016

Session B1 Optical measurements

- 09:00** *Development and testing of a system for time resolved measurement of droplet spectra in steam turbines*
M. Schatz, T. Eberle and D. Vogt
Institute of Thermal Turbomachinery and Machinery Laboratory (ITSM), University of Stuttgart, Germany
- 09:25** *Toward embedded optical measurement techniques for precision combustion monitoring in aero-engines*
G. Kraft, F. Giuliani and L. Pfeifferkorn
Combustion Bay One e.U., Graz, Austria
- 09:50** *Complex aero-engine intake aerodynamics - Part I: S-PIV capabilities for inlet flow distortion measurements*
D. Gil Prieto, G. Tanguy, P.K. Zachos and D.G. MacManus
Propulsion Engineering, Cranfield University, United Kingdom
- 10:15** *Complex aero-engine intake aerodynamics - Part II: Aerodynamic and inlet flow distortion analyses using S-PIV data and DDES simulations*
D. Gil Prieto, G. Tanguy, P.K. Zachos and D.G. MacManus
Propulsion Engineering, Cranfield University, United Kingdom
- 10:40-11:00** **Coffee break**

Session B2 Pressure probes I

11:00 *Novel usage of five-hole probes: Tidal channel turbulence measurements*

A. Young, R.U. Guion, N.R. Atkins and J. Costan

Whittle lab, University of Cambridge, United Kingdom

11:25 *On the impact dimensions of pneumatic probes on the response time*

C. Brüggemann, S. Hobel, M. Schatz and D. Vogt

Institute of Thermal Turbomachinery and Machinery Laboratory (ITSM), University of Stuttgart, Germany

11:50 *Fast settling millimeter-scale five-hole probe*

S. Grimshaw and J.V. Taylor

Whittle lab, University of Cambridge, United Kingdom

12:15 *Analysis and optimization of a high-frequency aerodynamic probe*

Z. Liu and G. Paniagua

School of Mechanical Engineering, Purdue University, Indiana, United States

12:40-14:00 Lunch at IBZ

Session B3 Pressure probes II

14:00 *Calibration and implementation of a transient sub miniature 5-hole probe to determine complex flow structures in turbomachines*

T. Zimmermann and M. Wirsum

Institute of Power Plant Technology, Steam and Gas Turbines, RWTH Aachen University, Aachen, Germany

14:25 *A miniature pseudo-multi-hole pressure probe calibration*

F. Ceyhun Sahin and J. Schiffmann

Laboratory of Applied Mechanical Design (LAMd), Swiss Federal Institute of Technology, Lausanne, Switzerland

14:50 *Experimental investigation geometry effects on five-hole probe performance*

K. Magkoutas, T. Efstathiadis and A.I. Kalfas

Laboratory of Fluid Mechanics and Turbomachinery (LFMT), Aristotle University of Thessaloniki, Thessaloniki, Greece

15:15-15:35 Coffee break

Session B1 Heat transfer measurements

- 15:35** *A comparison between transient heat transfer measurements using TLC and IR thermography*
S. Brack and J. von Wolfersdorf
Institute of Aerospace Thermodynamics (ITLR), University of Stuttgart, Germany
- 16:00** *Heat thin film gauge arrangements for transient heat transfer measurements*
I. Usandizaga, P. Beard, K. Chana and T. Povey
Osney Thermofluids Laboratory, Oxford University, United Kingdom
- 16:25** *Discrete functions approach to retrieve heat flux*
D. Cuadrado and G. Paniagua
School of Mechanical Engineering, Purdue University, Indiana, United States
- 16:50** **Closing session – Discussion for future meeting**
